

PRODUCT SPECIFICATIONS

#425 HEAVY DUTY STEAM COMPOUND

DESCRIPTION: #425 Hot Tank Compound is a heavy duty, granular, caustic based general purpose soak tank and steam cleaning compound. Designed for steam cleaning & soak/brush cleaning of food handling equipment, floors, greasy machinery. #425 has excellent soil penetration and will remove all types of grease, oil & carbonized soil. #425 is highly chelated to prevent scale and will not clog coils, nozzles or lines. #425 finds particular application in smoke houses, meat packing plants and other food industry facilities with heavy soil build-up problems.
