

PRODUCT SPECIFICATIONS

CLEAR & SAFE A-1

Clear & Safe A-1 is a metal protectant designed to offer protection from corrosion due to moisture in humid or wet environments. Applications generally are to offer protection for newly manufactured parts, steel, etc. prior to shipment or for parts while in process.

APPLICATION:

Apply product neat, as received with spray, dipping or rolling. Allow to dry. Product will dry to a soft, waxy film. Clean up can be accomplished with mineral spirits.
